PROFESIONAL RESUME

I stand out as a professional in constant learning in technological and social areas, committed to my responsibilities and motivated to reach new horizons. My career has been characterized by rapid growth, driven by unwavering commitment and outstanding efficiency in project execution.

SKILLS:

SQL: Extensive experience in using SQL to perform queries on large-scale databases. Proficient in utilizing merge libraries, advanced conditionals, and subqueries to ensure accurate and efficient results.

Python: Extensive command of the Python programming language, used for developing innovative and efficient solutions. Experienced in designing and creating automated programs to optimize distribution processes. I have applied the power of Python in Machine Learning projects, utilizing algorithms for data analysis and classification.
